#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document.

Regarding claim 1, the Examiner is not clear on the meaning of "the 'polyaxial type', i.e including a connection assembly" in line 8.

Regarding claim 2, line 2, "a part" is stated and appears to be different than "the part" stated in line 3 and also in line 5 of claim 8; "this connection part". The Examiner is unclear on what structural features of the claim the phrase "a part", "the part", and "this connection part" refer to.

Regarding claim 5, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. Although the claim reads "for instance" in line 5, "for instance" and "for example" are being interpreted as the same. See MPEP § 2173.05(d).

Art Unit: 3733

Regarding claim 5, the phrase "preferably" in line 4, renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ralph et al (US Pat 5882350).

Ralph et al. disclose vertebral osteosynthesis equitment/a polyaxial orthopedic device comprising an anchor member (120 in Fig 4) that has an elastically deformable structure (it is interpreted that if the anchor is inserted into the bone, it will deform to some degree), a rod (250 in Fig 9), a connection assembly (142 in Fig 5), a base portion (area indicated by 135 in Fig 5), a junction portion (200 and 132 in Fig 9), wherein said junction portion has a flexible structure and is slightly stretchable longitudinally (slots/recesses 141 and 133 in Fig 5 allow the junction portion to be flexible to some degree, also indicated in Col 6 Lines 10-40), wherein the junction portion is composed of an extension of the base portion (seen in Fig 10 where the base portion is indicated

Art Unit: 3733

by element 132), said base portion and said connection assembly not being in contact with one another and are able to be shaped to guide the movement of a connection part (185 in Fig 9), and lateral bearing surfaces (Fig 9, the surface 203 between elements 200 and 132).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ralph et al. (US Pat 5882350).

Ralph et al. disclose a similar invention except for a rod composed of a flexible material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the rod of Ralph et al. out of a flexible material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Art Unit: 3733

#### Conclusion

The prior art made of record and relied upon is considered pertinent to the applicant's disclosure. See PTO-892 for art cited of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexis M. Wistermayer whose telephone number is 571-270-3304. The examiner can normally be reached on Monday - Friday 8 am - 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
